

SAVE YOUR MONEY, HONEY!

The GCBH does not recommend any dietary supplement for brain health.*

6 Things to Consider Before You Buy a Supplement

Beware of supplement claims that sound too good to be true.

Check for warnings related to your specific health conditions and for third-party quality assurance.

Show your health care provider what drugs & supplements you're already taking. They may interact with each other.

Think about whether you're already getting enough of a nutrient through your diet before you buy.

Food is better than pills to get the nutrition you need to help your brain.

Make sure you **don't take more of a supplement than is recommended**; more is not always better.

*Unless you are one of the relatively few people in the U.S. with a vitamin B12/folate deficiency. It is estimated that 4.4% of U.S. adults 50+ are low on vitamin B12, but even fewer are low on folate. See Evatt, M.L. et al. (2010) "Association between vitamin B12- containing supplement consumption and prevalence of biochemically defined B12 deficiency in NHANES III (Third National Health and Nutrition Survey)." Public Health Nutr. 13(1), 25-31. See also <https://www.cdc.gov/nutritionreport/pdf/Second-Nutrition-Report-Overview-Factsheet.pdf>
