RE: Letter of Support for AARP MWV Age-Friendly Community Participation

Dear Todd

On behalf of the Town of Ossipee, we are proud to provide this Letter of Support to AARP New Hampshire for the application for membership of our town to join the previously established Mount Washington Valley regional Age-Friendly Community.

As one of the many towns that make up the Mount Washington Valley and as members of the MWV Economic Council, we are aware of the rapidly growing needs of our aging population. Improvements in making our towns more livable should and will be coordinated across several town lines. We have many links to other organizations that service Carroll County in its health, transportation, recreational and economic efforts to make improvements for all ages. We recognize we have much to offer and to gain from collaborations of this nature.

We, therefore are pleased to provide a representative from the Town of Ossipee to join the Steering Committee of the MWV Age-Friendly Community. We look forward to actively taking advantage of AARP resources and opportunities.

This endorsement is good for one year, with the intention to revisit it annually. This letter does not imply or bind the Town to a financial commitment in any way.

TOWN OF OSS�PEE
