Support For Local Entrepreneurs

Main Street Orrville’s Center for Business Innovation creates long-term success for its historic downtown.

By Brett Wernsky

The resuscitation of any Main Street program anywhere in America is a difficult and challenging undertaking. To be successful, a program should be built on a solid foundation that will endure through the ups and downs of the economic cycle. Main Street Orrville is one of the many success stories in naming poor communities to become vibrant and economically thriving destinations.

Main Street Orrville’s Center for Business Innovation (CBI) was founded in January 1999. The Center would like to thank the local businesses, residents, and community leaders for their support and dedication to the success of the program.

The CBI is a partnership between the city of Orrville, the local chamber of commerce, and local businesses. It has been instrumental in revitalizing the downtown area and attracting businesses and residents.

The CBI’s mission is to create a vibrant and economically thriving downtown area that is attractive to both residents and visitors.

Rodd Welker, entrepreneur-in-residence, meets with Kevin and Monica Summers of Expert T’s of Orrville.
