

Fact Sheet: Arizona

Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig
AARP Public Policy Institute

Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 56 percent of Arizona's private sector employees—roughly 1,280,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.

Currently in Arizona, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

Arizona's Situation by the Numbers

About 56 percent of Arizona workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in Arizona businesses with fewer than 100 employees are much less likely to have access to a plan (78 percent) than workers in larger businesses (41 percent). In raw numbers, about 731,000 small-business employees do not have access to a retirement plan compared with about 548,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 83 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (55 percent) or a bachelor's degree or higher (43 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a high school degree who did not have access to an employer plan (686,000 versus 246,000).

- **Workers at all earnings levels do not have a plan:** More than 967,000 of Arizona employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 76 percent of the 1,280,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 69 percent of Hispanic workers and about 56 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 52 percent (662,000) of the roughly 1,280,000 employees without a workplace retirement plan.

Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.¹ Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.²
- **Helps increase retirement income:** Social Security is essential to retirement security, but its

Institute**

average retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.³

- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

Arizona: Who is NOT Covered by a Workplace Retirement Plan?
(percentage and number of private wage and salary workers ages 18-64 whose employer does not offer a retirement plan)

Item	Group	%	Number
	ALL	ALL	
		56.1%	1,279,555
Age	18-34 years	66.8%	580,672
	35-44 years	53.1%	266,972
	45-54 years	50.1%	262,438
	55-64 years	44.2%	169,473
Race & Ethnicity*	Hispanic	69.4%	527,780
	Asian (non-Hispanic)	41.9%	31,064
	Black (non-Hispanic)	56.1%	62,570
	White (non-Hispanic)	48.5%	617,838
Education	Less than high school	82.9%	246,258
	High school	58.5%	347,308
	Some college	54.7%	416,165
	Bachelor's or higher	43.4%	269,824
Gender	Male	56.5%	699,639
