

Fact Sheet: Louisiana

Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig
AARP Public Policy Institute

Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 55 percent of Louisiana's private sector employees—roughly 802,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.

Currently in Louisiana, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

Louisiana's Situation by the Numbers

About 55 percent of Louisiana workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in Louisiana businesses with fewer than 100 employees are much less likely to have access to a plan (71 percent) than workers in larger businesses (40 percent). In raw numbers, about 480,000 small-business employees do not have access to a retirement plan compared with about 322,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 71 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (53 percent) or a bachelor's degree or higher (42 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a high school degree who did not have access to an employer plan (369,000 versus 107,000).

- **Workers at all earnings levels do not have a plan:** More than 627,000 of Louisiana employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 78 percent of the 802,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 72 percent of Hispanic workers and about 61 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 42 percent (336,000) of the roughly 802,000 employees without a workplace retirement plan.

Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.¹ Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.²
- **Helps increase retirement income:** Social Security is essential to retirement security, but its average

**Public Policy
Institute**

retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.³

- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

Louisiana: Who is NOT Covered by a Workplace Retirement Plan? (percentage and number of private wage and salary workers ages 18-64 whose employer does not offer a retirement plan)

Item	Group	%	Number
ALL	ALL	54.5%	802,171
Age	18-34 years	63.5%	392,498
	35-44 years	50.3%	162,227
	45-54 years	43.7%	125,042
	55-64 years	49.9%	122,404
Race & Ethnicity*	Hispanic	72.0%	53,646
	Asian (non-Hispanic)	64.1%	16,590
	Black (non-Hispanic)	60.7%	255,330
	White (non-Hispanic)	49.9%	466,400
Education	Less than high school	71.5%	106,552
	High school	61.5%	326,192
	Some college	52.8%	235,897
	Bachelor's or higher	42.1%	133,529
Gender	Male	51.8%	407,644
	Female	57.6%	394,527
Employer Size	Under 10	84.3%	176,391
	10-49	69.7%	219,121
	50-99	55.7%	84,381
	100-499	46.5%	102,831
