

Fact Sheet: Michigan

Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig
AARP Public Policy Institute

Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 48 percent of Michigan's private sector employees—roughly 1,692,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.

Currently in Michigan, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

Michigan's Situation by the Numbers

About 48 percent of Michigan workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in Michigan businesses with fewer than 100 employees are much less likely to have access to a plan (70 percent) than workers in larger businesses (34 percent). In raw numbers, about 941,000 small-business employees do not have access to a retirement plan compared with about 751,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 71 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (49 percent) or a bachelor's degree or higher (40 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a high school degree who did not have access to an employer plan (1,030,000 versus 130,000).

- **Workers at all earnings levels do not have a plan:** More than 1,248,000 of Michigan employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 74 percent of the 1,692,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 60 percent of Hispanic workers and about 48 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 23 percent (392,000) of the roughly 1,692,000 employees without a workplace retirement plan.

Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.¹ Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.²
- **Helps increase retirement income:** Social Security is essential to retirement security, but its

Institute**

average retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.³

- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

Michigan: Who is NOT Covered by a Workplace Retirement Plan?
(percentage and number of private wage and salary workers ages 18-64 whose employer does not offer a retirement plan)

Item	Group	%	Number
ALL	ALL	47.5%	1,692,121
Age	18-34 years	59.0%	777,615
	35-44 years	42.8%	340,922
	45-54 years	38.9%	333,943
	55-64 years	40.6%	239,641
Race & Ethnicity*	Hispanic	59.6%	92,792
	Asian (non-Hispanic)	48.7%	72,018
	Black (non-Hispanic)	48.0%	192,956
	White (non-Hispanic)	46.5%	1,300,104
Education	Less than high school	70.8%	129,894
	High school	51.8%	532,300
	Some college	48.7%	659,864
	Bachelor's or higher	40.1%	370,064
Gender	Male	46.3%	856,016
	Female	48.7%	836,105
Employer Size	Under 10	82.2%	350,673
	10-49	70.1%	434,158
	50-99	53.8%	156,656
	100-499	45.4%	237,456
	500-999	42.0%	68,336
	1,000+	28.9%	444,842
Earnings Quintile	\$14,000 or less	74.7%	598,614
	\$14,001 to \$25,000	56.7%	397,639
	\$25,001 to \$40,000	39.1%	252,157
	\$40,001 to \$63,500	34.1%	243,001
	Over \$63,500	28.6%	200,701

Source: U.S. Census Bureau's Current Population Survey, March Supplements 2012-2014.

Note: The results are based on three-year averages from 2011-2013. The sample includes workers whose longest-held job was in the private sector. Earnings quintiles are based on all wages and salary earned by U.S. workers, whether or not they were covered by a retirement plan.

* Other non-Hispanic category is not shown, so sum of race & ethnicity categories may not sum to total
