

Fact Sheet: North Carolina

Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig
AARP Public Policy Institute

Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 53 percent of North Carolina's private sector employees—roughly 1,716,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.

Currently in North Carolina, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

North Carolina's Situation by the Numbers

About 53 percent of North Carolina workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in North Carolina businesses with fewer than 100 employees are much less likely to have access to a plan (74 percent) than workers in larger businesses (37 percent). In raw numbers, about 1,028,000 small-business employees do not have access to a retirement plan compared with about 687,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 79 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (53 percent) or a bachelor's degree or higher (38 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a

high school degree who did not have access to an employer plan (853,000 versus 300,000).

- **Workers at all earnings levels do not have a plan:** More than 1,371,000 of North Carolina employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 80 percent of the 1,716,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 77 percent of Hispanic workers and about 55 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 42 percent (717,000) of the roughly 1,716,000 employees without a workplace retirement plan.

Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.¹ Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.²

**Public Policy
Institute**

- **Helps increase retirement income:** Social Security is essential to retirement security, but its average retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.³
- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

North Carolina: Who is NOT Covered by a Workplace Retirement Plan?
(percentage and number of private wage and salary workers ages 18-64 whose employer does not offer a retirement plan)

Item	Group	%	Number
	ALL	ALL	
		53.0%	1,715,682
Age	18-34 years	62.8%	796,086
	35-44 years	49.7%	378,429
	45-54 years	44.6%	308,312
	55-64 years	44.9%	232,856
Race & Ethnicity*	Hispanic	77.0%	259,668
	Asian (non-Hispanic)	46.7%	43,984
	Black (non-Hispanic)	54.9%	362,789
	White (non-Hispanic)	48.7%	998,973
Education	Less than high school	79.1%	300,188
	High school	58.4%	562,656
	Some college	52.9%	555,082
	Bachelor's or higher	37.6%	297,756
Gender	Male	51.8%	870,178
