

Fact Sheet: Ohio

Workplace Retirement Plans Will Help Workers Build Economic Security

David John and Gary Koenig
AARP Public Policy Institute

Access to an employer-based retirement plan is critical for building financial security later in life. Yet, about 45 percent of Ohio's private sector employees—roughly 1,873,000—work for an employer that does not offer a retirement plan. Significant numbers of workers at all levels of earnings and education do not have the ability to use payroll deductions to save for retirement.

Currently in Ohio, workers of larger employers are more likely to have a retirement plan than workers of smaller employers. The probability of having a workplace retirement plan also differs considerably by workers' earnings level, education, and race and ethnicity. The lack of ability to participate in an employer-provided retirement plan, however, spans all levels of education and earnings, and cuts across all groups.

Ohio's Situation by the Numbers

About 45 percent of Ohio workers ages 18 to 64 in the private sector work for businesses that do not offer a retirement plan.

- **Small-business employees are less likely to have a plan:** Workers in Ohio businesses with fewer than 100 employees are much less likely to have access to a plan (66 percent) than workers in larger businesses (32 percent). In raw numbers, about 1,075,000 small-business employees do not have access to a retirement plan compared with about 798,000 in businesses with 100 or more workers.
- **Workers at all education levels do not have a plan:** About 73 percent of workers who did not have a high school degree did not have an employer-provided retirement plan—a much higher percentage than workers with some college (46 percent) or a bachelor's degree or higher (33 percent). But in raw numbers, workers with at least some college who did not have access to an employer plan exceeded those workers without a high school degree who did not have access to an employer plan (939,000 versus 200,000).

- **Workers at all earnings levels do not have a plan:** More than 1,494,000 of Ohio employees with annual earnings of \$40,000 or less did not have access to a workplace plan. These workers represent about 80 percent of the 1,873,000 employees without an employer-provided retirement plan.
- **Access to a plan differs substantially by race and ethnicity:** About 65 percent of Hispanic workers and about 53 percent of African Americans lacked access to an employer-provided retirement plan. Minorities accounted for about 21 percent (398,000) of the roughly 1,873,000 employees without a workplace retirement plan.

Why Access to Payroll Deduction Retirement Savings Plans Is Important

- **Makes saving easier:** About 90 percent of households participating in a workplace retirement plan today report that payroll deductions are very important and make it easier to save.¹ Saving at work appears to be critical: Few households eligible to contribute to an Individual Retirement Account outside of their jobs regularly do so.²
- **Helps increase retirement income:** Social Security is essential to retirement security, but its

Institute**

average retirement benefit is only \$1,300 a month. Most retirees will need additional resources. Providing workers with a convenient way to save is an important step to increase the amount of assets a person will have at retirement: A 2014 Employee Benefit Research Institute study found that about 62 percent of employees with access to a retirement plan had more than \$25,000 in total savings and investments, and 22 percent had \$100,000 or more. However, only 6 percent of those without access to such a plan had over \$25,000 saved, and only 3 percent had \$100,000 or more.³

- **Allows individuals to build their own economic security:** Retirement savings plans help workers achieve economic security through their own efforts. Greater access could also help improve economic mobility and reduce wealth disparity.

Ohio: Who is NOT Covered by a Workplace Retirement Plan?
(percentage and number of private wage and salary workers ages 18-64 whose employer does not offer a retirement plan)

Item	Group	%	Number
ALL	ALL	45.1%	1,873,083
Age	18-34 years	56.5%	956,686
	35-44 years	39.4%	348,966
	45-54 years	36.4%	342,505
	55-64 years	35.7%	224,926
Race & Ethnicity*	Hispanic	65.0%	99,613
	Asian (non-Hispanic)	49.9%	34,177
	Black (non-Hispanic)	53.2%	235,928
	White (non-Hispanic)	43.0%	1,475,559
Education	Less than high school	73.1%	200,175
	High school	48.7%	734,186
	Some college	45.8%	618,712
	Bachelor's or higher	33.1%	320,009
Gender	Male	43.1%	912,481
	Female	47.2%	960,602
Employer Size	Under 10	82.8%	411,489
	10-49	63.4%	504,722
