

How did the **Affordable Care Act** impact Americans ages **50-64** ?

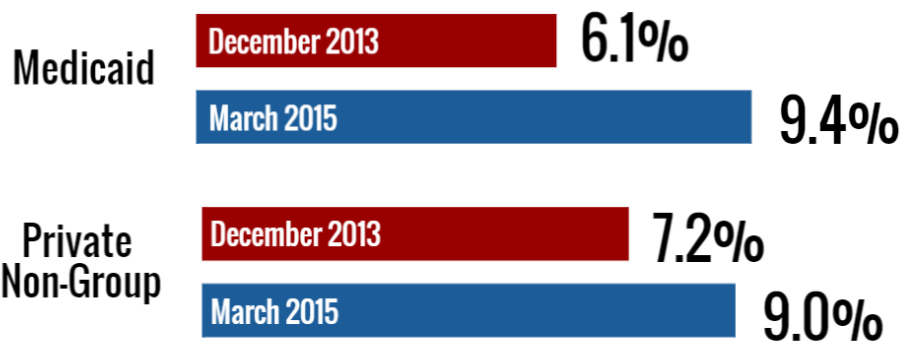

Uninsured Rate Dropped **47%**

over first two ACA open enrollment periods

Overall, adults ages **50-64**

GAINED COVERAGE.

But despite overall coverage gains, **GAPS REMAIN.**

Among adults ages 50-64:

Those with the **lowest income** are **14x** as likely as those with the highest income to be uninsured.

Hispanics are **2x** as likely as white, non-Hispanics to be uninsured.

Those in **fair or poor health** are **2x** as likely as those in very good or excellent health to be uninsured.

Those in **Medicaid non-expansion states** are nearly **2x** as likely as those in expansion states to be uninsured.
