

## Fact Sheet: Alaska

# Alaska Could Save \$13.1 Million by Helping People Save for Their Own Retirement

William Shiflett and Catherine Harvey  
AARP Public Policy Institute

When individuals save for retirement they are less likely to rely on public assistance programs later in life. State-facilitated retirement savings plans for small-business employees would help people save more for retirement and, in turn, save significant taxpayer dollars for programs like Medicaid, Supplemental Security Income, the Supplemental Nutrition Assistance Program, and housing assistance. More than 30 states are considering creating retirement plans for private-sector workers whose employers do not already offer one. New research finds that Alaska would save \$13.1 million on public assistance programs between 2018 and 2032 if lower-income retirees save enough to increase their retirement income by \$1,000 more per year.
