Fact Sheet: Louisiana (2022)

Social Security Quick Facts

Joel Eskovitz, Jim Palmieri
AARP Public Policy Institute

Who Receives Benefits

- **Retirement benefits**: The largest group of beneficiaries in Louisiana are its 573,565 retired workers, who account for 62 percent of all Social Security beneficiaries in the state.¹

- **Disability benefits**: Louisiana has 148,001 residents who receive Social Security disability income, representing 16 percent of the state’s Social Security beneficiaries.²

- **Spousal and survivor benefits**: In Louisiana, 123,299 spouses, former spouses, widows, widowers, and parents of deceased beneficiaries³ account for 13.3 percent of the state’s Social Security beneficiaries.⁴ An additional 80,535 children, representing 8.7 percent of the state’s Social Security beneficiaries, receive benefits.⁵

Impact

- **Economic engine**: Annual Social Security benefits to Louisianians pump at least $14.7 billion into the state economy, with $9.6 billion paid annually to those receiving retirement benefits and their eligible family members, $2.5 billion via survivors benefits, and an additional $2.5 billion paid through the disability program.⁶ Recipients buy goods and services with their Social Security benefits, increasing business sales—which help not only the companies making those sales but also the firms that supply them. The result is more jobs and income to businesses and workers in Louisiana.

- **Reduced poverty**: Social Security lifted 223,000 Louisianians 65 or older out of poverty from 2018 through 2020. In fact, 44.3 percent of the state’s residents in this age group would be in poverty but for Social Security benefits; that number falls to 14.1 percent when Social Security income is included. Nationally, the program lifted 16.1 million people 65 and older out of poverty, reducing the proportion below the poverty line from 37.8 percent to 9 percent.⁷

Nearly one in five Louisiana residents—925,400 people—receives Social Security benefits. These payments inject more than $14.7 billion into the state’s economy every year.
Average Benefits

- **Retirement benefits**: In Louisiana, the average Social Security retired worker benefit is $1,437 per month (about $17,200 annually). The national average monthly retirement benefit is $1,544.8

- **Disability benefits**: In Louisiana, the average Social Security disabled worker benefit is $1,222 per month (about $14,700 annually). The national average monthly disabled worker benefit is $1,277.9

Reliance

- **At least half of income**: 317,171 Louisiana residents, or 44 percent of individuals 65 and older, live in families that rely on the program for at least half of their income.

- **More than 90% of income**: 180,356 Louisiana residents, or 25 percent of individuals 65 and older, live in families that rely on the program for at least 90 percent of their income.

- **Black individuals rely more on Social Security income**: Overall, 31 percent of Black Louisiana residents 65 and older live in families that rely on Social for at least 90 percent of their income as compared with 24 percent of white residents.
