Fact Sheet: Wisconsin (2022)

Social Security Quick Facts

Joel Eskovitz, Jim Palmieri
AARP Public Policy Institute

Who Receives Benefits

- **Retirement benefits**: The largest group of beneficiaries in Wisconsin are its 950,228 retired workers, who account for 74.5 percent of all Social Security beneficiaries in the state.¹
- **Disability benefits**: Wisconsin has 153,293 residents who receive Social Security disability income, representing 12 percent of the state’s Social Security beneficiaries.²
- **Spousal and survivor benefits**: In Wisconsin, 99,893 spouses, former spouses, widows, widowers, and parents of deceased beneficiaries³ account for 7.8 percent of the state’s Social Security beneficiaries. An additional 72,518 children, representing 5.7 percent of the state’s Social Security beneficiaries, receive benefits.⁴

Impact

- **Economic engine**: Annual Social Security benefits to Wisconsinites pump at least $22.2 billion into the state economy, with $17.2 billion paid annually to those receiving retirement benefits and their eligible family members, $2.3 billion via survivors benefits, and an additional $2.7 billion paid through the disability program.⁶ Recipients buy goods and services with their Social Security benefits, increasing business sales—which help not only the companies making those sales but also the firms that supply them. The result is more jobs and income to businesses and workers in Wisconsin.

- **Reduced poverty**: Social Security lifted 264,000 Wisconsinites 65 or older out of poverty from 2018 through 2020. In fact, 33.5 percent of the state’s residents in this age group would be in poverty but for Social Security benefits; that number falls to 6.6 percent when Social Security income is included. Nationally, the program lifted 16.1 million people 65 and older out of poverty, reducing the proportion below the poverty line from 37.8 percent to 9 percent.⁷
Average Benefits

- **Retirement benefits**: In Wisconsin, the average Social Security retired worker benefit is $1,587 per month (about $19,044 annually). The national average monthly retirement benefit is $1,544.8
- **Disability benefits**: In Wisconsin, the average Social Security disabled worker benefit is $1,263 per month (about $15,200 annually). The national average monthly disabled worker benefit is $1,277.9

Reliance

- **At least half of income.** 442,637 Wisconsin residents, or 46 percent of individuals 65 and older, live in families that rely on the program for at least half of their income.
- **More than 90% of income.** 170,858 Wisconsin residents, or 18 percent of individuals 65 and older, live in families that rely on the program for at least 90 percent of their income.
- **Black individuals rely more on Social Security income.** Overall, 39 percent of Black Wisconsin residents 65 and older live in families that rely on Social for at least 90 percent of their income as compared with 17 percent of white residents.

3. In certain circumstances where parents are dependent on their children for at least half of their income, the parents can receive parent’s benefits.
