

## Fact Sheet

# 14 Years of the Affordable Care Act: Impact on Adults Ages 50 to 64 in Idaho

Olivia Dean, Jane Sung, and Catelyn Middlebrooks  
*AARP Public Policy Institute*

The Affordable Care Act (ACA)—now 14 years old—has played a critical role in expanding access to affordable health coverage for millions of adults ages 50 to 64 in Idaho, including through ACA’s health insurance marketplaces.

## 38%

The drop in the uninsured rate  
among adults ages 50 to 64  
since ACA implementation

Since the start of the ACA, the number of adults ages 50 to 64 in Idaho with health insurance has increased from 249,398 in 2012 (out of 297,191) to 297,457 in 2022 (out of 330,386). Meanwhile, the share of adults ages 50 to 64 in Idaho without health insurance (the uninsured rate) has fallen significantly, dropping from 16.1 percent in 2012 to 10.0 percent by 2022. This decline marks a 38 percent drop in the uninsured rate for adults in this age group between 2012 and 2022.<sup>1</sup>

## 10.0%

The share of adults ages 50 to 64  
who remained uninsured in 2022

In 2022, 32,929 people ages 50 to 64 in Idaho, or 10.0 percent of adults in this age group, remained uninsured. Policy actions have contributed to record-low uninsured rates. One such example is states keeping people enrolled in Medicaid during the COVID-19 pandemic in exchange for enhanced federal funding. Enactment of enhanced federal premium tax credits under the American Rescue Plan Act (ARPA) of 2021 and extended under the Inflation Reduction Act (IRA) of 2022 also helped make Marketplace coverage more affordable.

## 23,356

Adults ages 50 to 64 who relied  
on nongroup (individual)  
health insurance in 2022

As of 2022, 7.1 percent of adults ages 50 to 64 in Idaho relied on the nongroup (individual) health insurance market for coverage. The number of adults ages 50 to 64 with nongroup coverage went from 31,856 in 2012 to 23,356 in 2022.

## 25,008

Adults ages 55 to 64 who  
enrolled in Marketplace  
coverage in 2024<sup>2</sup>

In 2024, 24 percent of Idaho enrollees in a Marketplace plan are between the ages of 55 and 64—totaling 25,008 people.

**5,000**

Adults ages 50 to 64 who are estimated to become newly eligible for Marketplace coverage after losing Medicaid<sup>3</sup>

As states lift the COVID-era restrictions on Medicaid disenrollment, many individuals are seeking new sources of affordable health insurance coverage. 5,000 adults ages 50 to 64 in Idaho are estimated to be newly eligible for Marketplace coverage after losing Medicaid. Of this group, 4,000 are estimated to be eligible for premium tax credits, including the enhanced premium tax credits under ARPA and IRA.

**89,715**

Marketplace enrollees who pay reduced or no premiums in 2024 due to federal tax credits<sup>2</sup>

Totaling 89,715 people, the majority (86 percent) of Marketplace enrollees of all ages in Idaho pay reduced or no health insurance premiums due to availability of federal premium tax credits.

**\$121**

The average monthly Marketplace premium after premium tax credits in 2024<sup>2</sup>

On average nationally, consumers (regardless of age) who receive premium tax credits in 2024 save more than \$700 per year on premiums due to the expanded tax credits under ARPA and IRA. On average in Idaho, Marketplace plan premiums are \$121 per month after tax credits, but 27 percent of Marketplace enrollees pay even lower premiums: \$10 or less per month.
