Caregiving

QC-1. The next few questions are about caregiving. A “caregiver” is someone who provides care for an adult relative, friend or spouse who is ill, frail, elderly, or has a disability. Care may include assisting with medical or nursing tasks like giving medications, wound care, special diets, or communicating with doctors; also helping with personal needs, household chores, transportation, financial management or a variety of other tasks. Such care may be provided to someone who lives either in the same household or somewhere else.

In the past 5 years, since 2008, have you yourself provided this sort of care to an adult relative, friend or spouse 18 years or older who is ill, frail, elderly or has a disability?
