

Annotated Questionnaire for *ID Theft: Who's At Risk?*

AARP Fraud Watch Network and *AARP The Magazine* commissioned an online survey using an e-Rewards online panel. The total sample size was n=2250. Data were weighted to represent the US population of adults 18+ by age, gender, ethnicity, and region using the Census' Current Population Survey. Data were collected August 6-August 12, 2014. Significance testing was performed at the 95% confidence interval with a +/- 2.1% margin of error for the total sample. The full report can be found on our website at aarp.org/research.
