

50+ Coronavirus Tracker: Wave 5 Oversample

Conducted by NORC at the University of Chicago for AARP

*Interviews: 5/29/2020-06/09/2020
1,798 adults*

Margin of error: 3.37 percentage points at the 95% confidence level among all adults

NOTE: All results show percentages among all respondents, unless otherwise labeled.

Percentages may not always sum to 100%.

"" indicates less than 0.5% "-" indicates 0%*

<https://doi.org/10.26419/res.00385.009>

Q1. How concerned would you say you are about the coronavirus?

NORC 05/29-06/09/2020	Total	White NH	African American NH	Hispanic	Other NH
Very concerned	53	46	75	47	53
Somewhat concerned	33	41	21	30	26
Not very concerned	10	11	1	14	17
Not at all concerned	4	3	2	7	4
DON'T KNOW/ SKIPPED ON WEB/ REFUSED	1	-	1	3	-

STUDY METHODOLOGY

This survey was conducted by the AmeriSpeak Panel department of NORC at the University of Chicago. Data were collected using the probability-based, nationally representative AmeriSpeak® Panel.

AmeriSpeak conducts surveys for experts who can't afford to be wrong.

Since its founding by NORC at the University of Chicago in 2015, AmeriSpeak has produced more than 500 surveys, been cited by dozens of media outlets¹ and become the primary survey partner of the nation's preeminent news service, The Associated Press. AmeriSpeak has the highest AAPOR response rate among commercially available household survey panels in the U.S. AmeriSpeak captures a true picture of America, providing better representation than other survey panels for hard-to-reach populations, including low-income households, less educated persons, young adults, rural households, persons who are less interested in the news, and social and political conservatives.

Technical information about the AmeriSpeak Panel is available [here](#).

During the initial recruitment phase of the AmeriSpeak Panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame, supplemented with households selected from the USPS Delivery Sequence File. Selected U.S. households were then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face interviewing in the homes of respondents). AmeriSpeak provides sample coverage of approximately 97 percent of the U.S. household population. Those excluded from the sample include people in group-living quarters and those with P.O. Box only addresses and some newly constructed dwellings.

AmeriSpeak Panel members selected for this study were scientifically selected to represent persons age 50 and over in the 50 states and the District of Columbia. There were 1,798 AmeriSpeak respondents completing the survey—1,598 via the web and 200 via telephone. Interviews were conducted in English and Spanish. The final stage survey completion rate is 20.2 percent. The overall margin of sampling error is +/-3.37 percentage points at the 95 percent confidence level for a 50% survey statistic, including the design effect. The margin of sampling error may be higher for subgroups.

Once the AmeriSpeak study sample has been selected and fielded, and all the study data have been collected and made final, a statistical weighting process is used to adjust for any survey nonresponse as well as any noncoverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census division, race/ethnicity, and education.

¹AmeriSpeak research has been cited in major media outlets including Time Magazine, The New York Times, CNN, Forbes, Chicago Tribune, and others. NORC's AmeriSpeak clients represent a broad range of federal, foundation, non-profit, and private sector organizations, including not limited to: AARP, U.S. Centers for Disease Control & Prevention, Consumer Reports, Kaiser Family Foundation, Legal Services Corp. of America, National Science Foundation, NASA, National Cancer Institute, National Institute of Justice, Pew Research Center, The New York Times, Robert Wood Johnson Foundation, Truth Initiative, dozens of university-based researchers, among others. In addition, NORC's AmeriSpeak Panel is the sample source for several studies that have been approved by the United States Office of Management and Budget (OMB), including studies sponsored by the U.S. Centers for Disease Control & Prevention, the US. Department of Defense, and the Internal Revenue Service.

AARP 50+ Coronavirus Tracker: Wave 5 Oversample

The same survey nonresponse adjustment process was applied to the overall sample, which included the general population sample and the oversamples. Overall poststratification variables included RACEETH3 (3 categories race/ethnicity: Hispanics, Non-Hispanic African American, and Non-Hispanic Other) * age, RACEETH3 * gender, RACEETH3 * education, census division, and race/ethnicity (4 categories: Hispanics, Non-Hispanic African American, Non-Hispanic White, and Non-Hispanic Other). One population weight summing to the population size was created. Then we normalized the population weight differently to create two normalized weights, which summed to the number of completes. WEIGHT was normalized overall. The proportions of RACEETH3 reflected the proportions in the population. WEIGHT2 was normalized by RACEETH3. The proportions of RACEETH3 reflected the proportions in the completes. WEIGHT should be used when analyzing the general population. WEIGHT2 could be used to analyze specific race/ethnicity subgroups.

Weighting variables were obtained from the 2019 Current Population Survey. The weighted data reflect the U.S. population of adults age 50 and over. For more information, email amerispeak-bd@norc.org.

ABOUT NORC AT THE UNIVERSITY OF CHICAGO

NORC at the University of Chicago is an objective, non-partisan research institution that delivers reliable data and rigorous analysis to guide critical programmatic, business, and policy decisions. Since 1941, NORC has conducted groundbreaking studies, created and applied innovative methods and tools, and advanced principles of scientific integrity and collaboration. Today, government, corporate, and nonprofit clients around the world partner with NORC to transform increasingly complex information into useful knowledge.
