VITAL VOICES

Issues That Impact Oklahoma Adults Age 45 and Older, October 2021
INTRODUCTION

There are currently about 117 million Americans who are 50 and older; this number will grow to 157 million by 2050. The 50 and older population is and will continue to be an essential contributor to American society. Understanding the needs and opinions of older Americans is critical to ensuring they live longer and healthier lives.

Vital Voices is a new and exciting program of research undertaken by AARP. Through this research program, we are launching a new initiative that will deliver critical, current, and state-specific data to 53 states on a rolling three-year schedule between 2019 and 2021. We are making this data available to the public to assist with the development of programs, products, and policies for older adults. This data will allow those in leadership positions to:

• Predict the need for a specific program or interest in a particular issue.
• Enhance program and product innovation and development.
• Track issues and attitudes over time to assess shifts in public opinion.
• Take action on critical advocacy issues.

Never before has AARP launched a research program of this size and with this much promise. We give it to you, hoping that it will significantly impact the work you do.
Survey Results for Oklahoma-Health Questions

Issues That Impact Oklahoma Adults Age 45 and Older
Oklahoma residents age 45+ think many healthcare issues are important, with staying mentally sharp topping the list.

Important Healthcare Issues

- Increasing rent: 29%
- Size of your property: 24%
- Size of your home: 22%

HOME-1. How much do you think each of the following would impact your ability to remain in your home as you age? (Percent ‘a lot’) (n=706)
More than four in ten (44%) Oklahoma residents age 45+ agree that having activities geared toward adults with dementia is extremely or very important.

Importance of Activities Geared Toward Adults with Dementia

- Extremely important/very important: 44%
- Somewhat important: 32%
- Not very important/not at all important: 21%
- Don’t know/refused: 3%

LIVCOMM4. How important it is to you personally to have activities specifically geared towards adults with dementia in your community right now? (n=706)
In October 2021, AARP engaged ANR Market Research Consultants to conduct a quantitative research study among Oklahoma residents age 45 and older. Topics included healthcare, the economy, financial issues, independent living, long-term care, caregiving, retirement issues, and opinions of AARP.

**706 Interviews**
**Oklahoma Adults Age 45+**
**Fielded in October 2021**

ANR completed a total of 706 interviews (354 via landline telephone, 176 via cell phone, and 176 online). Respondents were screened to meet the following criteria:

- Age 45+
- Resident of Oklahoma

Survey length averaged 21.4 minutes by telephone and 17.6 minutes online.
METHODOLOGY

Sampling Procedure

Landline, cell phone, and online sampling were used for this research, with the telephone sample drawn randomly from a list of Oklahoma residents age 45 and older, purchased from Aristotle, and online sample provided by Fulcrum. A total of 34,712 records were utilized. The list of 1,571,226 Oklahoma residents age 45 and older was randomly divided into 1,572 replicates of 1,000 records for telephone dialing. Initially, 20 replicates were released for calling, with additional replicates being opened as necessary. In all, 32 replicates representing a total of 31,585 records were dialed to complete the telephone portion of this study.

The study’s sample of 706 respondents yields a maximum statistical error of ±3.7% at the 95% level of confidence. (This means that in 95 out of 100 samples of this size, the results obtained in the sample would be within ±3.7 percentage points of the results obtained had everyone in the population been interviewed.)

Interview Methodology

The survey was launched on October 6, 2021 and closed on October 20, 2021.

Telephone interviewing was active between 5:30 p.m. and 9:00 p.m., with some additional calling done between 10:00 a.m. and 4:00 p.m. If necessary, up to 8 call attempts per telephone number were made to reach an eligible respondent. All numbers were called at multiple times of the day as well as days of the week to maximize each resident’s opportunity for inclusion in the study.

Percentages of some questions may exceed 100% due to rounding or the use of multiple response question formats.

All data have been weighted by age, gender, and race/ethnicity according to 2019 U.S. Census Bureau Current Population Survey (CPS) statistics.
AARP is the nation’s largest nonprofit, nonpartisan organization dedicated to empowering Americans 50 and older to choose how they live as they age. With nearly 38 million members and offices in every state, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands, AARP works to strengthen communities and advocate for what matters most to families with a focus on health security, financial stability and personal fulfillment. AARP also works for individuals in the marketplace by sparking new solutions and allowing carefully chosen, high-quality products and services to carry the AARP name. As a trusted source for news and information, AARP produces the nation’s largest circulation publications, AARP The Magazine and AARP Bulletin.
