AARP Members’ primary concerns center around health.

**Top health concerns for Members:**

- **Medicare benefits available in the future**: 78%
- **Staying mentally sharp**: 78%
- **Living a healthy lifestyle**: 72%
- **Having health insurance**: 69%
- **Paying for healthcare expenses**: 67%
- **Declining physical health or chronic conditions**: 65%

Half of the top 10 (out of 33) life events experienced by Members or their spouse/partner in the past two years are health-related, including:

- **Death of a loved one**: 37%
- **Chronic health problems**: 31%

**Differences Among Subgroups**

- **While death of a loved one** is a shared experience among Members or their spouse/partner regardless of age or race/ethnicity, Black/African American Members (52%) are more likely to report this type of loss.

- **The incidence of health-related life events** for Members or their spouse/partner over the last 2 years tends to increase with age.
