## **NURSING SCOPE OF PRACTICE**

Q33. Twenty-two states have passed a proposal to modernize outdated rules related to nurse practitioners and advanced practice registered nurses. These nurses, who have additional training in specific areas like elder care, often visit older patients in their homes. By updating the rules, nurse practitioners can serve as the primary or acute care provider for a patient.

Do you support or oppose modernizing outdated rules to allow nurse practitioners, who have advanced training, to serve as the primary or acute care provider for patients?

## **NURSE DELEGATION**

Q35. Some states are considering a proposal that would allow registered nurses to give other health care workers under their supervision the authority to perform certain tasks, such as the administration of medication. This can relieve family caregivers from having to perform the task themselves or hiring a registered nurse to do so.

Do you support or oppose allowing registered nurses in Indiana to delegate some of their responsibilities to other health care workers as long as they were trained to do so?
