

PRIMARY CARE PROVIDERS' VIEWS ON FAMILY CAREGIVERS

Providers Working with Caregivers = Better Patient Outcomes

Nearly all (**97%**) providers say caregivers play an **important role** in patient care

8 in **10** of their patients with caregivers are age 50+

TOP BARRIERS PREVENTING PROVIDERS FROM INTERACTING WITH FAMILY CAREGIVERS

1

Not Knowing Who The Primary Caregiver Is

2

Time Constraints

FUTURE TRENDS

Nearly **7** in **10** providers believe they will work with caregivers **more** in the next **few years**

INCENTIVES FOR MORE INTERACTION

Offering **longer** appointments and **reimbursing** the time spent with caregivers

Provider and family caregiver discussions predominantly revolve around **caregiving how-to's**:

- Managing medications
- Arranging services (e.g. transportation, meals, etc.)
- Performing medical/nursing tasks
