Wisconsin registered voters age 40+ overwhelming support the three components of the CARE Act. They say:

- **94%** Hospitals should **INSTRUCT** caregivers on medical tasks
- **91%** Hospitals should **INFORM** caregivers before their loved one is discharged
- **81%** Hospitals should **IDENTIFY** the name of the caregiver in the patient’s medical record

This support is strong across political party lines.

Wisconsinites are family caregivers: If you’re not a caregiver now and weren’t one in the past, you’ll likely be one in the future:

- **71%** Current or Former Caregivers
- **50%** Likely Caregivers in the future
- **50%** Handle nursing and medical tasks
- **63%** Manage medications

1 in 3 family caregivers did NOT receive instruction of medical tasks when their loved one was discharged from the hospital.

Support family caregivers. Support the CARE Act.
