23.	Cost of prescription drugs	1	1	20	38	40	-

24. Please tell me which of the following statements regarding drug companies you agree with MOST? **(Rotate 1-2; Some/Other)**

(Some/Other) people say that government price controls on private drug companies is a bad idea that will only make things worse. If the government interferes with the free market, the result will be less money for innovative research, leading to fewer needed cures and life changing treatments. Price controls never work as hoped and should be opposed. Congress should stay out of it.	26
(Some/Other) people say that excessive drug prices hurt everyone while enriching drug companies and their executives. There is no reason Americans should be paying the highest drug prices in the world. Government needs to set limits on drug prices, just as other industrialized countries do. If drug companies can afford to spend billions on ads, lobbyists, and executive pay, then limiting their profits will save consumers money without harming research and innovation. Congress needs to take action now.	66
