Governor: AG Josh Shapiro holds a narrow 49% - 46% lead over State Sen. Doug Mastriano. Among PA voters 50+, Shapiro is ahead 48% - 47%. Shapiro's image (47% favorable/34% unfavorable) is stronger than Mastriano’s (37/44), but the race is within the margin of error. Shapiro is currently ahead thanks to having stronger support from Democrats than Mastriano receives from Republicans. All indications point to this race being competitive in November, with 50+ voters, who make up 61% of the likely voting electorate, poised to make the difference.

Senator: LG John Fetterman is ahead of Dr. Mehmet Oz 50% - 44% in the nationally watched open seat contest. Fetterman also leads narrowly (49% - 46%) among voters 50+. Fetterman’s image (46% favorable/36% unfavorable) is much stronger than Oz’s image (30/63), which is only +15 favorable among Republicans. A sizable gender gap exists, with women putting Fetterman in the lead, but men, especially those 50+, keeping Oz competitive.

Political Environment: Although the Democratic candidates have stronger images than their GOP opponents and are ahead on the ballots, a challenging political environment exists for Democrats in the Keystone State. Republicans hold a slight 47% - 45% edge on the generic Congressional ballot, while President Biden’s job approval is significantly underwater (36% approve/61% disapprove). Large majorities think the country (84%) and state (77%) are headed on the wrong track. Just 30% of voters say the US Economy is working well for them, with Inflation & Rising Costs the biggest issue in both the Senate & Governor’s races. 84% of voters are extremely motivated to vote in November’s election, driven by 87% of voters 50+ who are extremely motivated.

All data on slide is among Voters 50+
AARP commissioned the bipartisan polling team of Fabrizio Ward & Impact Research to conduct a survey. The firms interviewed 1382 likely Pennsylvania voters, which includes a statewide representative sample of 500 likely voters, with an oversample of 550 likely voters age 50 and older and an additional oversample of 328 Black likely voters age 50 and older, between June 12-19. The interviews were conducted via landline, cellphone, and SMS-to-web. The margin of sampling error for the 500 statewide sample is ±4.4%; for the 855 total sample of voters 50+ is ±3.3%; for the 433 total sample of Black voters 50+ is ±4.7%.

Due to rounding, answer choices may not always add up to 100%. Data is specified in the report that it is among either the 18+ or 50+ universe. Partisan crosstabs in this report represent how people identify themselves when asked, not how they are registered on the voter file.

For more information about this survey, contact Kate Bridges at kbridges@aarp.org. Media inquiries contact T.J. Thiessen at thiessen@aarp.org.
