

METHODOLOGY SUMMARY TABLE

Population	Nationwide survey of likely 2022 voters 50+
Total Sample Size	n= 1,200 sample likely 2022 voters +50 (800 women +50; 400 men +50) 100 oversample Black likely voters, women +50 100 oversample Latina likely voters, women +50, English-speaking 100 oversample Latina likely voters, women +50, Spanish-speaking 100 oversample Asian American and Pacific Islander American likely voters, women +50
Oversample	n= 400 oversamples 100 oversample Black likely voters, women +50 100 oversample Latina likely voters, women +50, English-speaking 100 oversample Latina likely voters, women +50, Spanish-speaking 100 oversample Asian American and Pacific Islander American likely voters, women +50
Sample source and Field partner	TargetSmart and Lake Research Partners
Margin of Error	The margin of error for women 50+ is +/-3.5% The margin of error for men 50+ is +/-4.9%
Field Dates	The study was fielded from September 6-13, 2022.
Data Collection Method	Landline/cell phone dialing and Text to Web
Survey Instrument	Designed by Lake Research Partners. 27 questions. Average time to complete survey was 16 minutes. Look here for exact wording of questions: https://www.aarp.org/research/topics/politics/info-2022/shes-the-difference-likely-voters-50-plus-survey-october-2022.html
Weighting procedures	The final data for this survey were weighted to correct for differences in the likelihood of selection for a given case and to balance the sample to known population parameters in order to correct for systematic under- or over-representation of meaningful social categories. The variables used in the weighting were: 800 women 50+: region, age, race, party identification, and education 400 men 50+: region, race, party identification, and education

	WOMEN	MEN	WOMEN 50-64	WOMEN 65+
Weighted N=	802	400	373	429
Unweighted N=	1201	400	597	604

Black women 50+: region, age, and education

English-speaking Latinas 50+: region, age, party identification, education

Spanish-speaking Latinas 50+: region, age, education

Latinas 50+ combined: party identification, education

Asian American and Pacific Islander American women 50+: party identification, education

These oversamples were weighted down into the base sample of women 50+ to their proper proportion of the universe for a total sample size of 800 women 50+.
